This is what happens when you use P.D.Care

Because the allergy is so severe, my dog kept scratching all night. i tested 3 times with PupeeDermCare. On the first test, dead skin cells diminished a little. After the second test, scratching at night was reduced ! On the last test after 5 days, the redness, dead skin cells, or the special odor from dogs suffering from skin disease truly diminished.

People may think that i have sprayed powder on the back of my dog. the dandruff is so severe such that i used Pupee-DermCare once a week for a month. It licks the paws much less, doesn't rub against the wall, and i feel just wonderful. my dogs suffering from disease truly diminished.

Can you see the hairs while takin the bath? after Pupee-DermCare cabonated spa, the loose hair are gently shedding, and the hairs feel so clean.

I didn't use medicinal but average shampoo, and dissolved the carbonated spa tablet into water. I didn't even rub in the product but just poured the water over the dog. the result? Unbelievable!!
The photo shows my dogs in the PupeeDermCare water.

PupeeDermCare

PupeeDermCare is a tablet-type high-concentration carbonated spa product. Carbonated spa is excellent for removing dead hair and exfoliation, and it has the effect of quickly remove dead skin cells and itching

Carbonated therapy effect

Carbonated Spa removes dead skin cells and dead flying hairs whenever a dog is scratched
deodorizing and hair treatment effect add shine to the hair, and even the family can live a healthy life.

Deodorization
Until the next bath, the odor-free period lasts for a long time.

Remove dead hair
During the carbonated spa, dead hairs float.

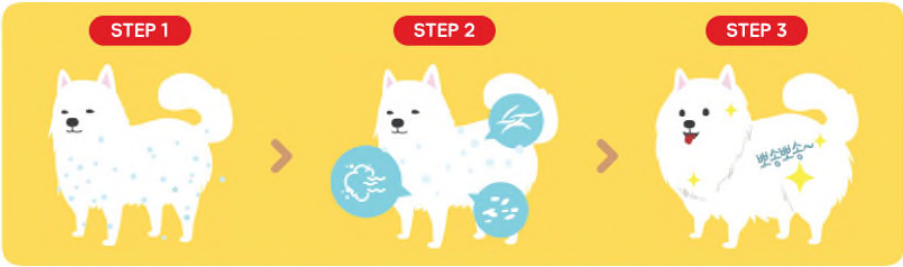
Remove dead skin
Get rid of dead skin cells that can not be removed with shampoo alone.

Hair shine
Dog hairs becames lustrous and voluminous even without the use of treatment products.

Recommendation

1	2	3	4	5
pets with dead skin cells or dandruff	pets that frequently lick the paws	pets that rub the back due to itchiness	pets with olily hairs	pets with foul body odor

Carbonated SPA Principle



Micro carbonates wrap around skin and hair

micro carbonates remove dead skin cells, dead hair, and smell

Cleansed skin is shiny, and hair has plenty of volume

HOW TO USE

Based on the small dogs under 5kg

1. After shampooing, put 10L of hot water in the bath and add 2 tablet to dissolve it.
2. Give carbonated spa bath for 10minutes.
   * it is good to pour carbonated water over the back while massaging
3. Rinse lightly and dry hairs using dryer.

Precautions for use

- ☑ After using PupeeDermCare, make sure to close tightly!
- ☑ Generally, for a pet weighing about 5kg, use 2 tablets in 10L of water.
- ☑ After spa, hairs will becme soft atter drying with dryer.
